

RE: LPFM radio signals.

I am asking that you consider carefully any changes that may affect my ability to listen to AIR 1 radio.

Air1 serves me as a resident of the local community with news, events, and commercial-free clean music for my family.

I believe the effects of interruption of service would be detrimental to the community. There are so many "shock-jock" type radio stations, and AIR 1 provides a listening environment that is appropriate for my entire family as well as the community.

AIR 1 serves as a light to this community and the airwaves.

Please consider how long this station has been on the air and how valuable it is.
